

Internal & External Corners

Quad, tri-quad, ovolo and rounded corners are well suited to the finishing of an internal or external corner.

Internal Corners

Internal corner moulds fit snugly into an interior corner serving to mask or cover irregular gaps of abutting sheet material.

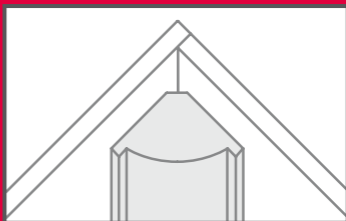

Quad

Tri-Quad

Ovolo

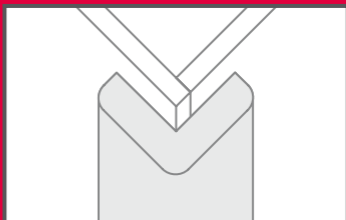

External Corners

External corner mouldings serve to provide protection to external corners as well as covering and or decorating any joint of lining material, timber panelling or sheet material.

External Corner

What goes where?

Porta Mouldings can be used to decorate any room in your home. Add definition, depth and drama to your room whilst covering any irregular gaps between the floor and walls, windows and walls and between internal corners or abutting sheet material. Choose from square, rounded or more decorative shapes in a variety of different sizes. Easy to install and paint, Porta Mouldings can transform any room.

Ovolo

Ovolo is a more classic style of moulding which gives a more decorative finished effect.

Tri-quad

Tri-quad is a more contemporary style moulding with a clean “chamfered” appearance. Also known as tri mould, splay quad and angle fillet.

Quad

Quad is a traditional style mouldings also known as quarter round.

Environmental Policy

Porta is committed to the use of timbers sourced from sustainably managed forests which give preference to timbers sourced from certified forests and/or forests compliant with international standard ISO 14001.
