

# FSC Meranti

by porta

Porta's range of FSC Meranti Mouldings are a cost-effective option when looking for a strong, stable and durable timber.

Designed with staining in mind, this timber species can enhance your home by its warm tones or can be painted to blend in with your colour scheme.

■ **Durability** – Meranti is a naturally stable and durable timber, best suited for indoor applications.

- Can be used in wet areas such as the kitchen, laundry and bathroom.

■ **Appearance & Finish**

- The term *Meranti* is applied to a large number of species of Shorea, which is a dominant hardwood in South East Asia.
- Due to the number of timber species in the Meranti family, there will be colour variation from pale pink to dark red and straw through to yellow.
- Meranti can be stained to enhance its consistent grain or painted to blend in with your colour scheme.

■ **FSC® Certified** – supporting improved management of the world's forests, ensuring that forest management is environmentally appropriate, socially beneficial and economically viable.

(TABMA AS.2)**  
41x18mm,  
66x18mm,  
91x18mm

**Pencil Round**  
41x12mm,  
66x12mm,  
41x18mm,  
66x18mm

## Dressed All Round (DAR)

41x12, 66x12, 18x18, 30x18, 41x18, 66x18,  
91x18, 115x18, 138x18, 185x18mm

## Other Mouldings

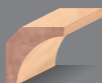

**Quad**  
12, 18, 23mm

**Rounded**  
30x8, 41x8mm

**External Corner**  
30mm

**Scotia**  
18, 30mm

## Porta Handy Tips

### Fixing

- Pre-drill recommended to prevent splitting.

### Finishing

- Can be painted, stained or polished.
- Being an open grain timber may need to be filled and/or primed if painting.
- Apply finish to mouldings before installing.

### Colour/Appearance

- Due to the number of species included under the Meranti name there will be colour variations ranging from pale pink to dark red and from straw through to yellow. If you are staining you may wish to select pieces that are close in colour to optimise stain result.
