Porta's Finger Jointed (FJ) Pine range of mouldings are suitable for many non-structural internal applications where attractive defect-free wood is required for decorative or functional purposes.

Representing a cost-effective solution when timber is desired, it is -

- 1. Knot free** – Made from high quality pine from which defects such as knots are removed
 - ✓ Easy to work - cut, nail and glue
 - ✓ Suitable for internal applications including wet areas – kitchen, bathroom and laundry
 - ✓ Easy to finish – Typically a cost-effective paint grade solution, but clear face also provides the option of staining or even leaving raw
- 2. Finger Jointed** – Micro-sized finger joints enhance the strength and stability
- 3. FSC® Certified** – In addition to the environmental benefits of a FJ construction, Porta's range of FJ mouldings are FSC® Certified – supporting improved management of world's forests.

Range available varies by state.
Pre-primed also available in selected profiles.

Porta Handy Tips

- Prior to installing, acclimatize the mouldings in the room where they are to be fixed for 24 to 48hrs. This will minimise further movement when installed.
- Start by cutting your moulding pieces a little long – you can always trim a little off.
- Pre Drill holes for nails to avoid splitting.
- Apply finish to mouldings before installing.

FSC® Certified – supporting improved management of the world's forests, ensuring that forest management is environmentally appropriate, socially beneficial and economically viable.
