PORTA END GRAIN SEALER

Teknos Teknoseal 4000

TEKNOSEAL 4000 is an emulsion sealer proven to increase the structural integrity of hardwood. It is designed to reduce end checking (drying splits) on exposed timber end grain to extend the life of timber.

Protects end grain to prevent end splits and checking

WHY YOU NEED END SEALER

- Protect your new deck or outdoor timber from the effects of moisture. Without this protection, there is a risk of end splitting and checking reducing the life of your timber

BENEFITS OF END SEALER

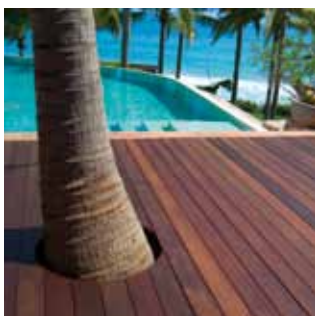

- Stops moisture moving through the end grain and reduces end cracking
- Assists in maintaining the beauty of your timber
- Excellent filling and blocking properties for high performance
- Can be over coated with a wide range of topcoats
- Safe water borne acrylic end grain sealer

HOW TO APPLY PORTA END GRAIN SEALER

- Timber should be clean and free from wood dust, deterioration and contamination prior to sealing
- Apply with brush or filling knife
- End sealer will dry clear with a gloss surface

CLEAN UP

- Wash brushes in soapy water and dry thoroughly

HOW TO ORDER?

Available in 750ml tubs. Call 1300 650 787 to order.
