

# Create with Mouldings: Classic Chevron

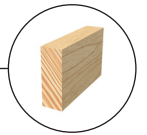

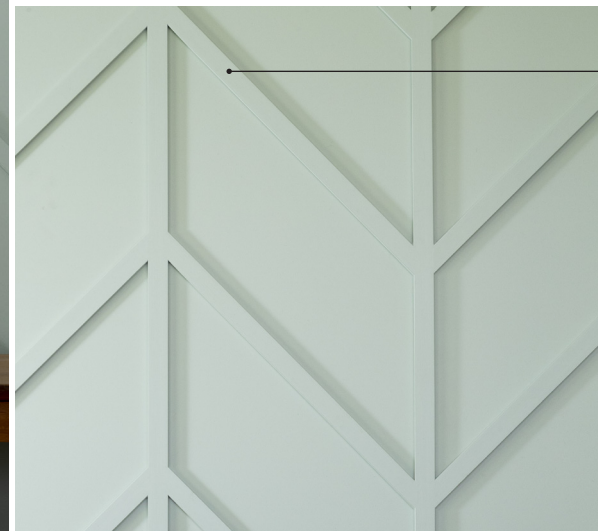

Add depth, style and architectural interest to a room with classic Chevron

Whether your home is traditional or contemporary in design, timber mouldings can be used to add depth, style and architectural interest to a room.

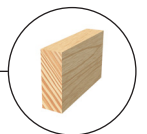

They can be simple and streamlined for a minimalist effect, classic, or elaborate and decorative.

To make the pattern stand out, leave the mouldings natural or paint them in a contrasting colour.

For a monochromatic look, paint the decorative wall trims in the same colour as your wall. For a more dramatic look, try a darker shade of your favourite colour.
