Create with Mouldings: Urban Geometric

Add warmth and movement to your room with natural materials

Decorative timber mouldings are a great way to add depth and dimension to a plain wall, creating a beautiful backdrop for your furnishings and fittings.

As a tactile backdrop, timber mouldings can also add new life to a room.

To allow the natural grain and variation of the timber mouldings shine through, we left them unfinished (you could paint them in a contrasting colour instead). To make the room appear larger, paint the wall and trims in the same colour.

Whether your home is classic, retro, colonial or modern in style, decorative wall trims can be used to enhance your room's design.
