

CONTOURS PRODUCT SPECIFICATIONS

WAVE LINL7821

Inspired by breaking waves at Australia's breathtaking beaches, Porta Contours in Wave add natural warmth, texture and energy to residential or commercial spaces.

As a fluid profile, Contours in Wave creates layers of texture through its rolling curves. Shadows abound in changing light highlighting the swell of the contours and softening the overall material palette.

Beautifully crafted, Wave is perfect as a feature in a kitchen, bedroom, hallway, lounge, or dining room. It can also be used to clad cabinetry and doors as well as creating concealed doorways for a seamless finish.

With its consistent tongue and groove joint, Wave can be used in conjunction with any other Contours profile to create a unique design. It is also suitable for curved applications.
