

ENDURE PRODUCT SPECIFICATIONS

RIVERINE ENTA7821

Porta Endure timber cladding combines the performance of Class 1 Cumaru timber with designer profiles to create a timeless looking, long lasting exterior finish.

Inspired by the rolling mountains surrounding Ormiston Gorge in the Northern Territory, Porta Endure in Riverine adds natural warmth, texture and movement. With its soft, undulating curves, an interesting shadow play is created over its contours in changing light.

PROFILE SPECIFICATIONS

Product Code	ENTA7821
Profile Type	Low Profile
Profile Size	91x21mm
Width	91mm
Depth	21mm
Length	3m (availability of length options may vary)
Cover	78mm
Species	Cumaru
Suitable Finishes	Oils, Stains
Suitable Uses	Exterior

TECHNICAL SPECIFICATIONS

Density	1085kg/m ³ / Hardness: 14.8 Janka kN / Durability: Class 1
