

ENDURE PRODUCT SPECIFICATIONS

STRATA ENT7821

Porta Endure timber cladding combines the performance of Class 1 Cumaru timber with designer profiles to create a timeless looking, long lasting exterior finish.

Inspired by the play of shadows in crevices across the Macedon Ranges, home of the iconic Hanging Rock, in Central Victoria, Porta Endure in Strata amplifies the effect of natural warmth, texture and movement across exteriors. The strong lines in Strata are enhanced by its shadow gap - creating variation and interest.

PROFILE SPECIFICATIONS

Product Code	ENTD7821
Profile Type	Low Profile
Profile Size	91x21mm
Width	91mm
Depth	21mm
Length	3m (availability of length options may vary)
Cover	78mm
Species	Cumaru
Suitable Finishes	Oils, Stains
Suitable Uses	Exterior

TECHNICAL SPECIFICATIONS

Density	1085kg/m ³ / Hardness: 14.8 Janka kN / Durability: Class 1
