CONTOURS TIMBER LINING BOARDS

ENGINEERED AMERICAN OAK

FOR BREATHTAKING INTERIORS, PORTA CONTOURS ARE NOW AVAILABLE IN STUNNING ENGINEERED AMERICAN OAK.

Contours in Engineered American Oak are perfect for enhancing your interior spaces, allowing you to create sophisticated and elegant design features.

With a distinctive textured grain pattern and a warm, light brown tone similar to European Oak, Contours in Engineered American Oak can be matched with oak flooring for a consistent and streamlined material palette.

Known for its hardwearing and versatile properties, American (White) Oak is ideal for use in high traffic areas. Its warm tone provides an inviting neutral backdrop that pairs beautifully with harmonious and contrasting interior design elements.

As a tactile canvas, Contours in Engineered American Oak add warmth to contemporary finishes and functional spaces. Whether used in flat or curved applications, they effortlessly become a standout feature in any commercial or residential space.

With a user-friendly secret fix tongue and groove connection, installation of Contours is simple. They can be securely fixed onto prepared plasterboard, timber, steel, brick, or masonry wall surfaces, providing a seamless and hassle-free installation experience.

Engineered American Oak Contours are FSC® certified. We are committed to sourcing timber from sustainable and environmentally responsible resources.

RIVERINE LINA7821AOEN **CURVED BEAD** CBA3916AOEN

With its undulating curves, an interesting shadow play is created over Riverine in changing light.

CIRQUE LINB7821AOEN **CURVED BEAD** CBB3916AOEN

As a fluted, textured canvas, Cirque softens strong lines and adds richness to the material palette.

WAVE LINL7821AOEN **CURVED BEAD** CBL3916AOEN

The rolling swells of Wave cascade into layers of textural variation.

STRATA LIND7821AOEN

The strong lines of Contours in **Strata** are enhanced by its shadow gap, creating variation and interest.

SHADE LINM7821AOEN

The sweeping curves of the **Shade** profile add gentle movement and dimension.

PINNACLE LINH7821AOEN

Maximising shadow play along the length of the profile, **Pinnacle** evokes a sense of drama.

STUNNING, TACTILE DESIGNS

Designed to deliver a premium seamless finish, Contours in Engineered American Oak are offered in six stylish profiles. These profiles can be creatively mixed and matched to create unique and bespoke designs. In addition to Engineered American Oak, Porta Contours are also available in other timber options, including Tasmanian Oak, Clear Pine, and Pre Primed Pine.

Lining Boards Size **91x21mm** | Cover **78mm** | Length **2.7m**

Curved Wall Beads Size **39x16mm** | Length **2.7m**

Timber is a natural material, with colour variations and features found within the same species. This is what makes it so appealing. It is important these natural characteristics are considered when creating design applications. The images featured in this brochure are indicative of Porta Engineered American Oak Contours colours only and may vary from actual colours due to printing inconsistencies.
