Discover Porta Contours in Feature Grade Tasmanian Oak

A celebration of natural characteristics in solid timber. Crafted from sustainably sourced and PEFC-certified Tasmanian Oak, each Porta Contours profile celebrates the unique characteristics and rich grain patterns that make Feature Grade timber exceptional.

Our commitment to sustainability goes beyond just sourcing. It's a conscious choice that optimises the usage of the timber resource, and actively contributes to offsetting carbon emissions, ultimately creating a healthier environment while reimagining elegant design solutions.

Timber is a natural material with colour variations and features within the same species. It is important these natural characteristics are considered when creating design applications. The images featured in this brochure are indicative only and may vary from the actual colour of the timber.

We've taken every precaution to provide accurate information in this brochure, but please note that we may modify or discontinue products as part of our ongoing product development. For the most up-to-date information, including product availability, claims, and pricing, please confirm at the time of purchase.
